How to Allow an Entire YouTube Channel

If you want every YouTube video from a particular channel to be whitelisted, follow these steps (FYI this does not apply to playlists):

1. With the YouTube video URL copied, paste it into the browser bar and press Enter. This will redirect to the YouTube video page with the full URL.

2. Click on the channel name below the video. This will redirect to the channel page for this YouTube channel.

3. Copy the URL at the top, which is the channel URL (it will have the channel in the URL): 2019-11-14_13.36.47.gif

4. Add the YouTube channel URL to the [Whitelisted Websites for MS Chromebooks](#).
