How to Find a YouTube URL from an Embedded Video

If a YouTube video is embedded in another site, follow these steps to find the URL of the specific video:

1. Navigate to the site URL where the embedded video is getting blocked (i.e. Nearpod, Edpuzzle, Khan Academy)

2. Click play on the video (if the initial play button is not the red YouTube play button). Then click to pause the video.

3. Right-click anywhere in the video

4. Select "Copy video URL"

   (Steps 2-4 are shown below):
   2019-11-14_12.46.51.gif

5. With the YouTube video URL copied, paste it into the browser bar and press Enter. This will redirect to the YouTube video page with the full URL:
2019-11-14_13.23.07.gif

6. Add the full YouTube video URL to the <u>Whitelisted Websites for MS Chromebooks</u>.
