Lock / Unlock Screen

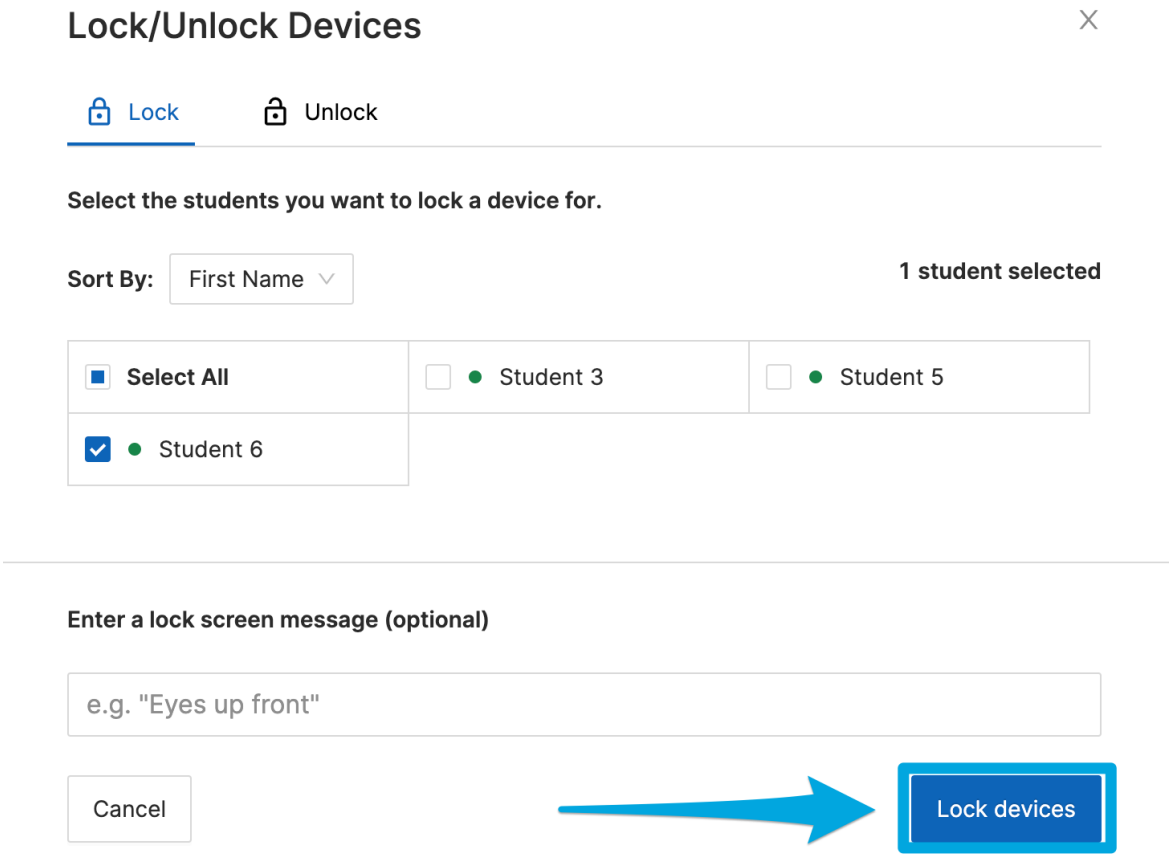

The lock screen command will **mute** and **disable all Chrome windows** on your student's device. The command is designed to unlock at the end of the session, but if a student joins a new session before the first session ends, they will remain locked.

To lock a student's screen:

1. Select one or more students using the checkbox to the left of each student's name
2. Click the **Lock / Unlock device** button
3. (Optional) enter a custom message to be displayed on the locked screen
4. Click **Lock** devices on the **Lock / Unlock** Devices confirmation popup window

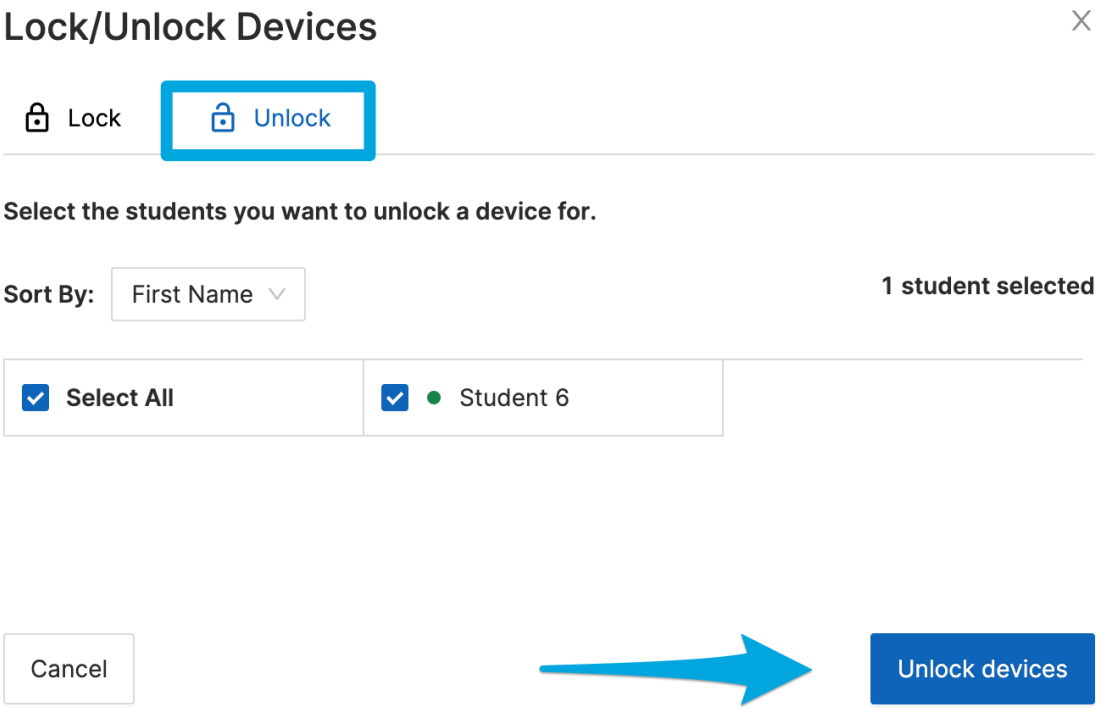

Devices may also be locked or unlocked by clicking the Lock / Unlock device button on the command bar and then making lock / unlock selections.

To unlock a student's screen:

1. Select one or more students using the checkbox to the left of each student's name
2. Click the **Lock / Unlock** device button
3. On the **Lock / Unlock** devices popup window, click the **Unlock** button
4. Confirm by clicking the **Unlock** devices button

If the student's device does not unlock after 30 seconds, reboot the student's device, wait for the student to connect to the session, and then issue the unlock command again.
